It doesn't matter what your niche is: System, database or network administrator, web developer or end-user developer; you probably need to work with multiple technologies, languages and file formats at the same time. Take charge of your script development regardless of what language you use and combine PrimalScript's powerful editing and packaging abilities with your scripting skills.

More than just a simple script editor, PrimalScript is the only Integrated Scripting Environment (ISE) that supports all of the file types and languages you need to work with every day. PrimalScript is also the only development tool that supports 32 and 64 bit execution, powerful integrated consoles, as well as debugging and packaging in one single, streamlined product. PrimalScript supports over 50 languages and file types ranging from PowerShell, VBScript, and JScript to ASP and ASP.NET. Additionally, dedicated tools for XML and SQL make complicated data processing a snap.

PrimalScript. The only scripting environment specifically designed for the way you work.
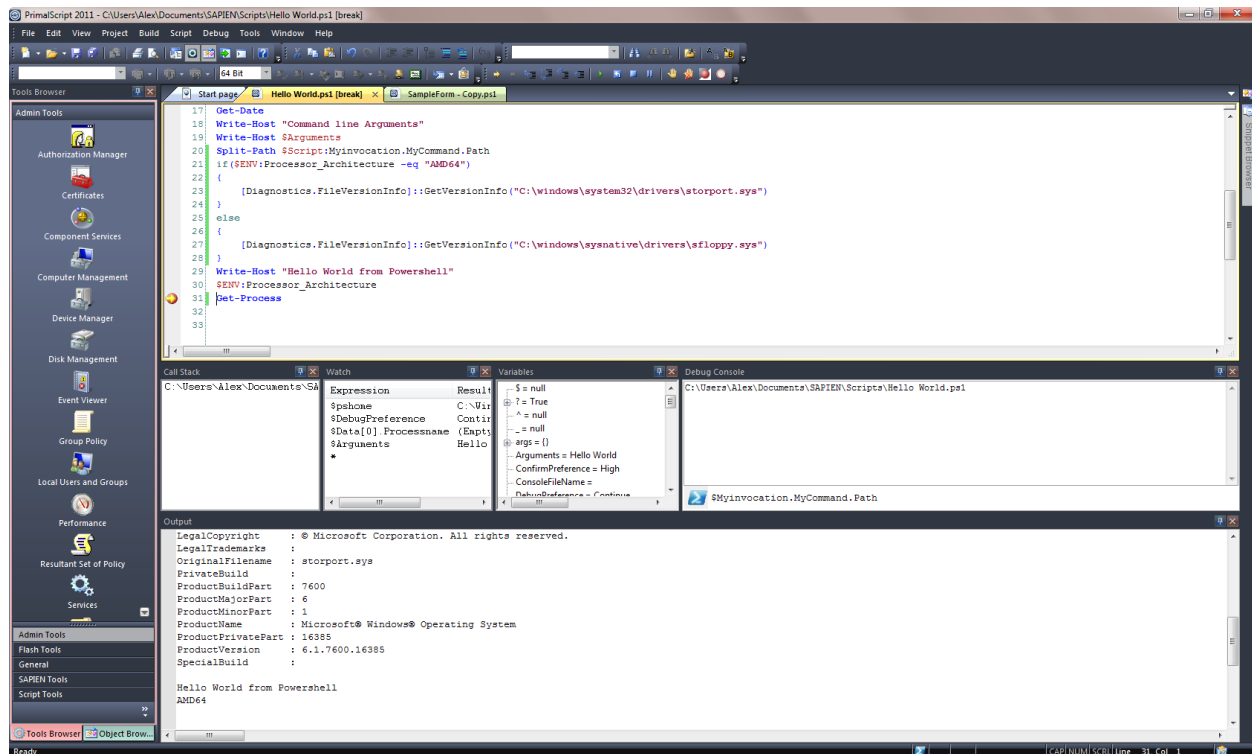

Powerful Script Editor

Supporting over 50 languages with syntax coloring, brace matching, code folding and a large number of enhanced features, this editor has everything you need.

Multi-Platform Support

Execute your scripts in 32 or 64 bit mode, with or without elevation all from within a single IDE. Tie your scripts to a specific platform or remote server with a single meta-comment.

Script Packaging

Package your scripts as stand-alone solutions for your users or distribute them royalty free in a secure package with minimal dependencies.

Native PowerShell Debugger

The integrated PowerShell debugger is equally at home on 32 and 64 bit systems and enables you to debug your scripts on either platform without ever leaving your development environment. Debugging elevated scripts operating systems supporting elevation is equally effortless. The new post mortem variable output ensures quick diagnostic of aborted operations and exit conditions.

Top Ten Reasons to Buy

Easily interpret your code

The lightning fast code editor makes it easy to spot keywords, functions, classes and marked regions in over 50 supported languages.

Use your existing skills while learning new things

Leverage your VBScript or JScript skills and learn new languages and experiment with them; all in the same development tool.

Script development and interactive work

Develop scripts and execute them in a fresh engine each time to reduce initialization errors. Or run your scripts directly in a shell and interact with the results.

Deploy solutions

Deploy your scripts to other users and administrators using SAPIEN's advanced script packager.

Remote execution simplified

Execute your VBScript and PowerShell solutions on other machines across your network using RSEE (Remote Script Execution Engine).

Comprehensive Help System

The included SAPIEN Document Explorer contains hundreds of samples, original documentation and links directly with online resources.

WYSIWYG HTML editing

Create web pages and reports, amplify the impact of your PowerShell script output via Out-HTML by adding graphics, headlines and additional information on an easy to use visual layout surface.
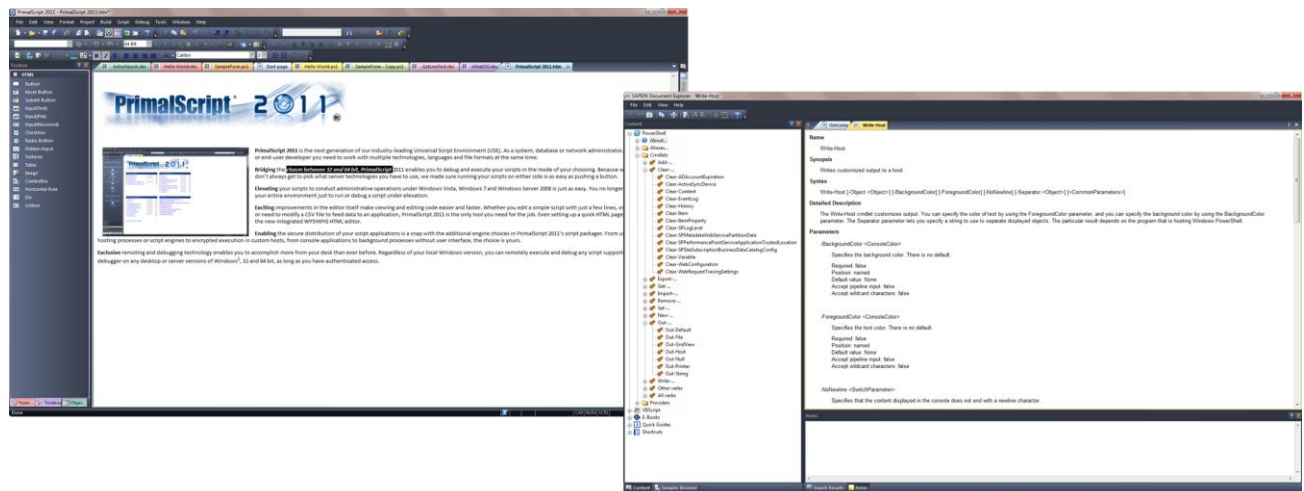

Platform independent debugging

Debug your VBScript, JScript and PowerShell code in 32 or 64 bit mode all from within one single integrated environment.

Unsurpassed support

Our product support delivers unsurpassed response times. You don't have to believe us, just go and ask our users in our support forum. Our community site ScriptingAnswers.com is frequented by some of the best scripting gurus in the industry. So whether you look for product support or help with a scripting problem, we are here for you.

Spend less time typing code

PrimalSense is helping you with code completion, supporting built-in language constructs as well as COM and .NET objects. Code snippets provide standard constructs and can easily be customized or expanded for your applications. Hundreds of expert written code samples enable you to create turnkey solutions for your enterprise.
